

SCC Minutes
January 20, 2016

- Karen opened the mtg @ 2:35 Justin was not there & Julie was late.
- Susan Cox presented data on Education Growth through SAGE testing, this went until about 3:10. Alisha will have a copy of this if anyone needs it
- Short discussion about PLC's & the time needed for that
- Karen talks about Proposals, FMP Julie? brought up that it only benefits 9th graders. Also need to focus on Jr & Sr that are falling behind for graduation. Also talked about GAP program which is credit recovery. Currently using E-School computers during 7 & 8 period? Would like 12,000 to get computers for the other periods that they offer it (GAP). Sinda told her that there are 15+ desktop computers in the Math department lab (that no longer exists) that are not being used. She will check with Dan Fluehe to see if they are compatible for the software they need.
- Everyone talked about who should come to present their cause next month. It looks like we are inviting Jerry Marshall (CE/DL), Provide data for FMP, English Dept Chair (chromebooks), Lissette to speak for ESL, Sinda to speak for Math Aide & Teacher. Maybe Emily regarding Counseling position. Lots were not in support of hiring someone for 1 yr, especially when they need to fix the problems that currently exist.
- It was also suggested to see if the English & Math Departments could get on the District Chromebook list.
- There are grants available for Agriculture. Surface tablets could probably get fuel my school funds. Biology probably could find grants too for the microscopes.
- Lillian motioned to adjourn @ 3:45, Julie second it.
