DO HIGH SCHOOL RIGHT

Use high school to prepare for college.

DID YOU KNOW?

Most colleges in Utah are open admission, meaning if you have a high school diploma and submit an application, you'll be accepted. With open-admission colleges, you don't have to worry about getting in—but you should do all you can in high school to prepare academically for college. Taking the right classes in high school can help you save money on future tuition costs and may help you earn scholarships.

Admissions requirements: Some colleges have specific admissions requirements. They will ask you to take classes beyond what you need for high school graduation. You may even need a certain ACT/SAT score or GPA to be admitted.

For more information on college admissions, see the Utah college information, beginning on pg. 20.

What advice do your family, friends, and community have for you about college?

AD VI CE

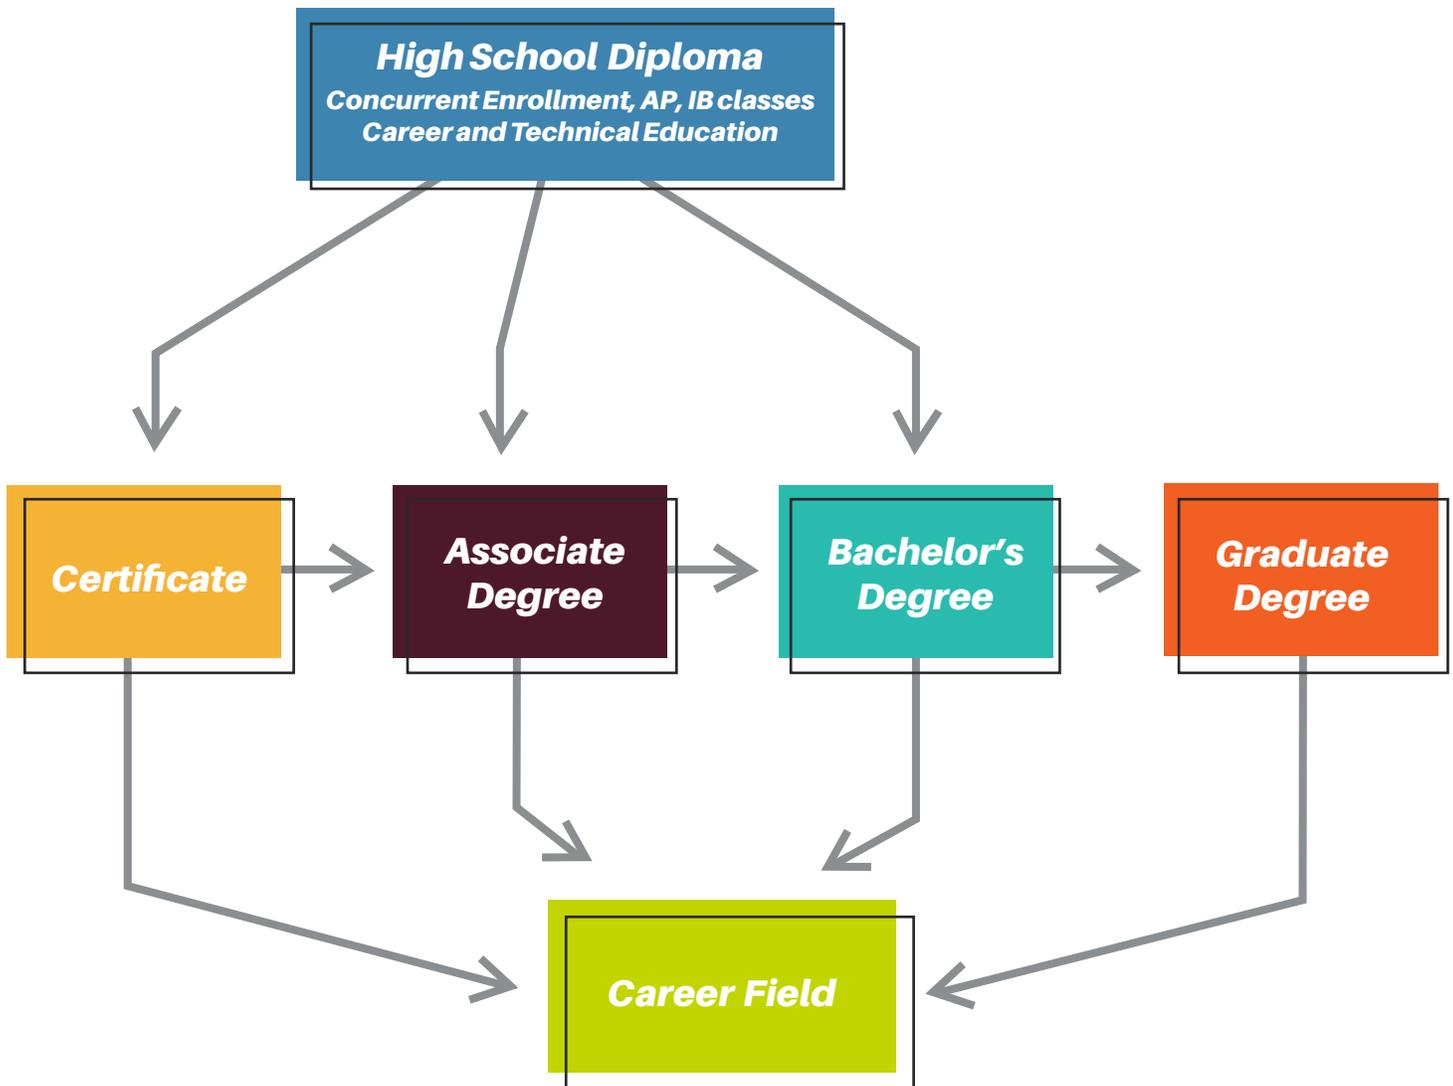

COLLEGE = OPPORTUNITY

WHAT IS COLLEGE?

Certificates, Associate degrees, Bachelor's degrees

Most jobs today require college education beyond high school. Think of college as one year, two years, four years, or more: college certificates can be earned in one year or less, associate degrees in two years, bachelor's degrees in four years, and graduate degrees in more than four years. The chart below shows how college credentials can build on each another to get you where you want to go.

High School Diploma

Provides foundational skills for success in life, college, and the workplace.

Examples:

- High school Career and Technical Education
- College-prep classes
- Work-based learning

1

Certificates and other Credentials

1 year or less

Provides basic preparation for specific jobs and careers. Programs can typically be completed in a few weeks to one year of full-time attendance.

Examples:

- Certificates of Proficiency
- Certificates of Completion
- Apprenticeships
- Licenses
- Professional Certifications

2

Associate Degrees

2 years

Provides preparation for employment or a bachelor's degree. Programs can typically be completed in two years of full-time attendance.

Examples:*

- Associate of Applied Science
- Associate of Science
- Associate of Arts

4

Bachelor's Degrees

4 years

Provides a well-rounded education for success in a career or for graduate study. Programs can typically be completed in four years of full-time attendance.

Examples:

- Bachelor of Science
- Bachelor of Arts
- Bachelor of Applied Science
- Professional Bachelor's Degree

+

Graduate and Professional Degrees and Credentials

Typically 1-6 years beyond a bachelor's degree

Provides advanced preparation in a variety of careers that require education beyond a bachelor's degree. Programs can typically be completed in one to six years of full-time attendance, depending on the field of study.

Examples:

- Master's degrees
- Doctoral degrees
- Graduate Certificates

*** There are two types of associate degrees:**

Associate of Applied Science

This degree provides basic preparation and related instruction for career development and entry into the job market, and in some cases for bachelor's degrees.

Associate of Science and Associate of Arts

This degree provides the first two years of a bachelor's degree and can be earned at a community college and then transferred to a university.

CAREER AND TECHNICAL EDUCATION

Career and Technical Education (CTE) programs are great ways to earn a college certificate or degree and prepare for a good career. Colleges offer CTE certificate and associate programs in all regions of the state, so you won't have to go far to earn a college credential.

Many certificates or associate degrees that you can earn through CTE programs build into and count toward bachelor's degree programs if you decide to go further in your education.

CTE can fast-track your career and help you earn more money sooner as you progress through college or your career.

There are CTE programs in health care, business, computer technology, engineering design, multi-media, advanced manufacturing, aerospace, homeland security, and many other fields.

CTE courses and programs are offered at Utah State University, Weber State University, Salt Lake Community College, Utah Valley University, Snow College, Southern Utah University, Dixie State University, and at tech colleges across the state (see the map on pg. 29-30).

Contact colleges' admissions offices to learn more or visit UtahFutures.org/schools/search.

PREPARING FOR COLLEGE

Take the right classes.

You can go to college no matter which classes you take in high school. But, to be best prepared for college, try to take the following classes in grades 9-12. They can help you earn better grades in college and can increase your score on the ACT (which helps with college admissions and scholarships).

If you are interested in playing college sports, be sure to check out NCAA guidelines at ncaa.org. You will have to take specific classes in high school to be eligible.

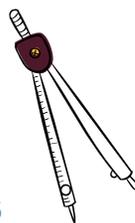

ENGLISH: 4 credits

MATH: 4 credits

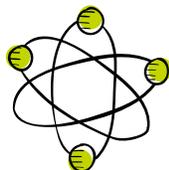

Math I, II, and III, plus one class beyond Math III

SOCIAL SCIENCE: 3 credits

SCIENCE: 3 credits

Lab-based, specifically biology, chemistry, and physics

LANGUAGE: 2 credits

of the same language

Take the right classes to double your odds of completing college, get better scores on the ACT, and prepare for scholarships.

EARN COLLEGE CREDIT WHILE IN HIGH SCHOOL

There are three ways to earn college credit in high school. This is a great way to get a head start on your college education, plus it'll save you time and money. Talk with your counselor to see which classes your high school offers.

When earning college credit in high school, talk with your counselor to make sure you're earning credit that counts for either general education or toward your major at the college you plan to attend.

	CONCURRENT ENROLLMENT (CE)	ADVANCED PLACEMENT (AP)	INTERNATIONAL BACCALAUREATE (IB)
What is it?	CE classes earn high school and college credit at the same time.	AP classes are writing- and research-intensive and emphasize study and test-taking skills.	IB classes are writing- and research-intensive. IB students also perform community service and write an extended essay.
Where is it available?	Available at most Utah high schools	Available at most Utah high schools	Only offered at certain Utah high schools
College credit earned through:	Passing the class	Exam score	Exam score
Cost: <small>*based on costs for the 2019-20 school year; costs may vary by high school</small>	<ul style="list-style-type: none"> • \$15-20 per class (\$5 per credit) • One-time application fee (varies by college) • Possible book costs 	<ul style="list-style-type: none"> • \$93 per exam • Possible book costs 	<ul style="list-style-type: none"> • \$116 per exam • Possible book costs
What college credit will I earn?	Many CE classes fulfill general education requirements. CE also offers introductory classes in college-level career and technical education.	Varies with each college—check with your college's academic advisor	Varies with each college—check with your college's academic advisor

What is a major?

When you're in college, you will select a college major, which is the specific subject area that you specialize in. Typically, between one-third to one-half of your college classes will be in your major or related to it. Some careers require a particular major, while others just ask for a college degree (like an associate or a bachelor's), so you can choose a major that interests you the most.

Visit [UtahFutures.org/student](https://utahfutures.org/student) to explore your interests and identify possible majors.

What is general education?

If you're earning an associate or bachelor's degree, you will be required to take several general education classes. General education allows you to explore a variety of subjects while developing critical thinking, writing, and problem-solving skills. No matter what major you decide, you'll have to take one or two classes in each of the academic disciplines like math, science, English, and history. You may also need to take general education courses in religion, intercultural/global, or a foreign language, depending on the college you attend.

TAKE MATH YOUR SENIOR YEAR

If you decide not to take math as a senior, you may be behind once you enter college because all college programs, except for some certificate programs, require at least one math class. The good news? You might be able to fulfill that math requirement while you are still in high school through AP, IB, or Concurrent Enrollment (CE) classes.

Depending on your major, a general education math class may be the last math class you ever need to take. Taking college-level math in high school can save money on future tuition costs. And it is easier to complete college-level math and get a good grade when the math concepts you just learned in high school are still fresh in your mind. Check with your high school counselor to see if CE, AP, or IB math classes are options for you.

A good way to earn your college math credit and save money is to take a CE class. These classes transfer from one Utah college to another, and most Utah high schools offer CE math classes. Meet with your counselor to see which classes are available at your school and which class fits best with your future plans.

Which CE math class should I take?

Are you interested in ...

- English/languages

GRADE-BY-GRADE CHECKLISTS

Whether you're considering a certificate, an associate degree, a bachelor's degree, or a professional/graduate degree, these grade-by-grade checklists will help you prepare to be successful after high school graduation! More detailed versions of these checklists can be found on UtahFutures.org/student.

8TH GRADE ✓

To see the complete grade-by-grade checklists, visit UtahFutures.org/student

Start the conversation now.

- Talk to a parent or other adult about what you like to do, what you're good at, and what you want for your future.

Learn about yourself.

- Explore careers through Sokanu on UtahFutures.org to learn where your strengths and interests lie.
- Take the Reality Check at UtahFutures.org.

Make your high school plan.

- Meet with your school counselor to develop a four-year high school plan. Try to fit in the recommended classes on pg. 9.

Prepare for high school classes.

- Some colleges require you to take certain classes. Be sure to research the admissions requirements at the colleges you're considering, including GPA, ACT/SAT scores, and specific high school classes they may require.
- Learn about the Regents' Scholarship requirements at RegentsScholarship.org.

Start saving for college.

- With the help of a parent or other adult, open a college savings account to save for your future. Consider a savings account through a bank, credit union, or a my529 account. Learn more at my529.org.

What are the grade-by-grade checklists?

These grade-by-grade checklists are designed to help you prepare for college during grades 8-12.

We recommend spreading these tasks out over your junior high and high school years, but you can complete most of these tasks at any time.

A close-up photograph of a yellow and black scientific calculator with a person's fingers typing on the keypad. In the background, a worksheet with several right-angled triangles and trigonometric problems is visible. The problems include: 1) $\sin \theta$, 2) $\cos \theta$, 3) $\tan \theta$, 4) $\sin \theta$, 5) $\cos \theta$, 6) $\tan \theta$, 7) $\sin \theta$, 8) $\cos \theta$, 9) $\tan \theta$.

9TH GRADE

To see the complete grade-by-grade checklists, visit [UtahFutures.org/student](https://utahfutures.org/student)

Do high school right.

- Sign up for the UtahFutures newsletter at [UtahFutures.org](https://utahfutures.org) to get college preparation and scholarship tips.
- Meet with your school counselor and develop a four-year high school plan.
- Review the Regents' Scholarship requirements at [RegentsScholarship.org](https://regentscholarship.org).

Explore college options.

- Read through the information on Utah colleges at [UtahFutures.org](https://utahfutures.org) to discover what colleges in Utah may be right for you.
- Talk with your parents, friends, and community members about their college experience, and start thinking about what you want out of yours.

Get involved in your school and community.

Volunteer experience and getting involved with after-school activities can boost your resume and potentially earn you money for college, since some scholarships require a record of volunteer hours.

- Volunteer in your community. Find volunteer opportunities with U Serve Utah (userve.utah.gov) and United Way 2-1-1 (uw.org/211/volunteer).
- Sign up for at least one school club or after school program. Talk to your school counselor or a teacher about what opportunities are available.

Learn about the different ways to pay for college.

- Read about the various ways to pay for college, including scholarships, grants, work-study, and student loans on [UtahFutures.org](https://utahfutures.org).
- Make a plan to pay for college with your parents. For example, part-time work in high school and college can help you pay for college costs and start building your resume.
- Start to build a scholarship and college admissions resume to track your achievements. Use the scholarship toolkit at [UtahFutures.org](https://utahfutures.org) to get you started.
- With the help of an adult, open a college savings account. Learn more at my529.org. If you already have a savings account, contribute what you can to it.

10TH GRADE ✓

To see the complete grade-by-grade checklists, visit UtahFutures.org/student

Stay involved and continue to explore your interests.

Volunteer experience and getting involved with after-school activities can boost your resume and potentially earn you money for college, since some scholarships require a record of volunteer hours.

- Continue to be involved in school clubs, after school programs, and volunteering. Track your volunteer hours using a spreadsheet.
- Sign up for the UtahFutures newsletter at UtahFutures.org to get college preparation tips and learn about scholarship opportunities.

Look into support and mentoring programs.

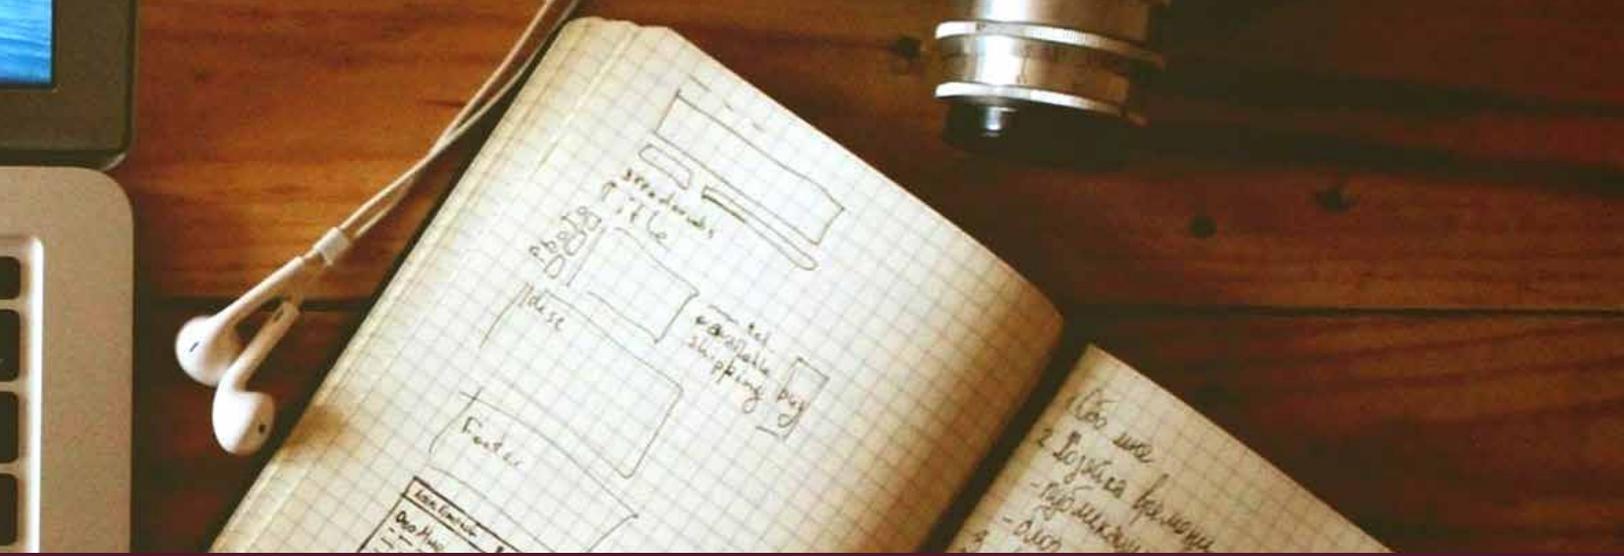

- Look through the Access Network Search at UtahFutures.org to see what support for your college dreams you might be eligible for in your area, like AVID, TRiO, or GearUP programs.

Think about what certificate or degree you will need for your future career.

- Read about the differences between a certificate, associate, bachelor's, and other advanced degrees on UtahFutures.org.
- Use your Sokanu results from UtahFutures.org to see what college majors you might be interested in.
- Find those majors and the certificates and degrees Utah colleges offer by exploring UtahFutures.org/programs/search.

Take the right classes.

- Meet with your school counselor to make sure you're on track to complete Math III no later than the end of 11th grade.
- Ask your counselor about Advanced Placement (AP), International Baccalaureate (IB), and Concurrent Enrollment (CE) classes available at your high school.

Start preparing for the ACT.

- Study! Your ACT score will help determine your eligibility for some scholarships and acceptance into some colleges.
- Get free ACT test prep materials at [UtahFutures.org](https://utahfutures.org).
- Download the free ACT app to get daily ACT test prep questions.

Research and apply for scholarships—yes, even before senior year!

- Make sure you're on track for the Regents' Scholarship. Check the details and contact a scholarship specialist at [RegentsScholarship.org](https://regentscholarship.org).
- Look for scholarships and apply to at least one this year. Keep your scholarship resume updated.

Learn how much college costs.

- Use the net price calculators on the College Search at [UtahFutures.org](https://utahfutures.org) to estimate college costs.

Keep saving for college.

- Add funds to your credit union, bank, or my529 savings account. If you haven't opened a my529 college savings account, do so. Learn more at my529.org.

11TH GRADE ✓

To see the complete grade-by-grade checklists, visit UtahFutures.org/student

Focus on your classes.

- Sign up for classes that stretch your mind, like Honors classes and classes that can earn you college credit, such as Advanced Placement (AP), International Baccalaureate (IB), and Concurrent Enrollment (CE). Talk to your school counselor for more information.
- Verify with your counselor that you are taking classes that will help you succeed in college.

Align your CTE pathway with your college plans.

- See how your high school CTE classes could apply to college-level CTE career pathways. Getting a certificate in a technical field can help you pay your way through college. Talk to your school counselor for ideas.

Think about what math class you'll take your senior year.

- Meet with your counselor to make sure you pick the right math class for your future. It's best to complete your college math requirements through Concurrent Enrollment while still in high school.
- Read on pg. 9 about what CE math class best fits with your future plans.

Take the ACT.

- Take the ACT in the spring. Get free ACT test preparation materials at UtahFutures.org or download the free ACT app to get daily ACT test prep questions. A good ACT score can help you earn scholarship money for college and determine your acceptance into some colleges.

Consider your college options.

- Make a list of your top college choices and get ready to apply during your senior year. If you're thinking about going to college in Utah, check out the information on Utah colleges on pg. 20-30 to learn more.

Learn about the many ways to pay for college.

- Forecast how much financial aid you could qualify for by using the FAFSA4Caster at fafsa.gov.

Get organized for your final year.

- Some colleges (and scholarships) require one or more letters of recommendation. Decide which teachers might be willing to write letters of recommendation next year and ask them in advance.
- Get a job over the summer to set aside money for college and gain valuable experience you can add to your resume.

Research possible careers.

- Review your career interest profiles or take them again at UtahFutures.org.
- Job shadow at a business/organization that interests you. Check to see if you could do an internship, which provides you with great real-world experience.
- Talk to professionals currently working in your area of interest. Ask your school counselor or parents/guardians to help you find them.

Keep applying for scholarships.

- Contact a scholarship representative to make sure you're on track for the Regents' Scholarship. Visit RegentsScholarship.org for more information. The scholarship staff are the best people to walk you through the application process.
- Apply for as many scholarships as you can. See if your high school has a scholarship coordinator to help you find scholarships, and don't forget to also look in your community and search online.

Visit college campuses.

- Go on a campus tour. Schedule one by visiting the college's website or calling.
- Attend a summer camp offered by a college near you.
- Attend a college fair to explore different college options. Ask your school counselor for information or research online.

12TH GRADE

To see the complete grade-by-grade checklists, visit UtahFutures.org/student

Stay focused.

- Check in with your counselor.
- Ask for letters of recommendation. Some colleges (and scholarships) require one or more letters of recommendation. Connect with teachers and counselors early in the fall of your senior year.

Take math during your senior year.

- Be sure to take the right math for your future career. Use the guide on pg. 9 to help you figure out which math class is right for you.

Apply to college in the fall.

- Apply to colleges during the fall of your senior year. Participate in Utah College Application Week at your school. Ask your counselor or college access advisor for more information.
- Apply to more than one college. It is important to keep your options open and compare the financial aid offers they may give you as well as other factors like class size, location, programs offered, and more. For help comparing colleges and universities, see the Facts at a Glance at UtahFutures.org.
- Check with the colleges you're applying to and see what ACT scores you should be aiming for. If you want to improve your score, study, study, study, and retake the ACT the fall of your senior year. Check college admissions deadlines to make sure your new ACT scores will be ready in time.

Fill out your FAFSA.

- Complete your Free Application for Federal Student Aid (FAFSA) as early as October at fafsa.gov.
*** Even if you don't think you will qualify for federal grants, you should still fill out the FAFSA. The State of Utah and many colleges require it for scholarships and other aid. ***
- Get help completing your FAFSA by attending a FAFSA Completion Open House during the school year. Visit UtahFutures.org to find dates.
- If you are an undocumented student, check to see what options might be available for you at educate-utah.org and review the information on pg. 43.

Continue applying for scholarships.

- Apply for the Regents' Scholarship if you're pursuing it. Check deadlines at [RegentsScholarship.org](https://regents.org/regents-scholarship).
- Research what scholarships are offered by the colleges you've applied to and check deadlines.
- Apply for as many scholarships as you can during your senior year.

Check on disabilities services.

- If you have an IEP/504 or a disability that will need accommodation, start making arrangements now by contacting colleges' disabilities resource centers.

Narrow it down.

- Visit the websites or call any colleges you've been accepted to and ask about their first-year experience programs and summer bridge programs.
- Send in your final high school transcripts to your college once you graduate.
- Be sure to accept any financial aid you might have received. Talk with your college's financial aid office to make sure you're good to go.

Be proud. Celebrate!

- Participate in your school's College Decision Day activities to celebrate your accomplishments. Ask your school counselor for more information.

What if I'm not going to college right after high school?

If you're planning on serving a religious mission, joining the military, or taking a break between high school and college, you should still complete your college and FAFSA applications.

Once you have been accepted to college, you can defer (postpone) enrolling for classes and put a hold on any scholarships you have been offered until you return.

Find more information about the deferment process by visiting the admissions page on the college's website.

Tips for getting college application fees waived

MOST COLLEGES WILL CHARGE AN APPLICATION FEE, USUALLY AROUND \$35-\$50.

- ★ **ASK!** Your school counselor, college access advisor, and other administrators and teachers may know about opportunities for college application fee waivers. Ask them early in the fall.
- ★ **SEARCH:** Some Utah colleges offer open houses in the fall and may offer fee waivers for students who attend. These are hosted at different locations across the state. Search potential colleges you are interested in and mark these events on your calendar early. Your high school may even host one.
- ★ **PARTICIPATE:** High schools across the state host Utah College Application Week (UCAW) in the fall. During UCAW, some colleges will provide fee waivers for participating high schools. To learn more about UCAW visit [UtahFutures.org](https://utahfutures.org).

UTAH COLLEGES

From community colleges to research universities, there's a college in Utah that's right for you. Think about what you want out of your college experience, and find out which college offers the programs you're interested in.

University of Utah

The University of Utah is the state's flagship university. As a leader in global research and innovation, the U provides students with exciting ways to discover and nurture their interests.

TYPES OF COLLEGES

In Utah, different colleges serve different purposes. Depending on your future career plans, some colleges may be a better fit than others for you.

Technical colleges

Technical colleges offer shorter certificate programs designed to qualify students to work in a variety of occupational fields. If you're looking to quickly start a job in a competitive and in-demand industry or skilled trade, a technical college may be the right fit for you. A technical college may be a separate institution or may be part of a larger community college or university.

Community colleges

Community colleges offer certificates and associate degrees at a lower cost than universities. They often have smaller class sizes as well. Community colleges offer job training programs that can get you quickly into the workforce, and general education and major courses that you can later transfer to a university for your bachelor's degree.

Regional universities

Regional universities offer associate, bachelor's, and master's degrees. Some regional universities offer career and technical education programs such as certificates and applied associate degrees as well.

Research universities

The primary mission of private and state research universities is to generate research and produce graduate students. While they still offer the same programs many other types of universities and colleges do, their ultimate goal as an institution is to research specialized fields and offer graduate degrees, like master's and doctorate degrees.

* Public versus Private colleges

Public colleges and universities are owned and supported by the State of Utah. Private, not-for-profit colleges and universities are not owned by the state but are regionally accredited. **For-profit schools may charge more in tuition, offer fewer degree programs, and are sometimes unaccredited, meaning they are not approved by a national or regional accrediting association.** Making sure a school is accredited and that credits may be transferred to other institutions is another way students can make sure they are getting an education worth their money and a credential that will attract potential employers.

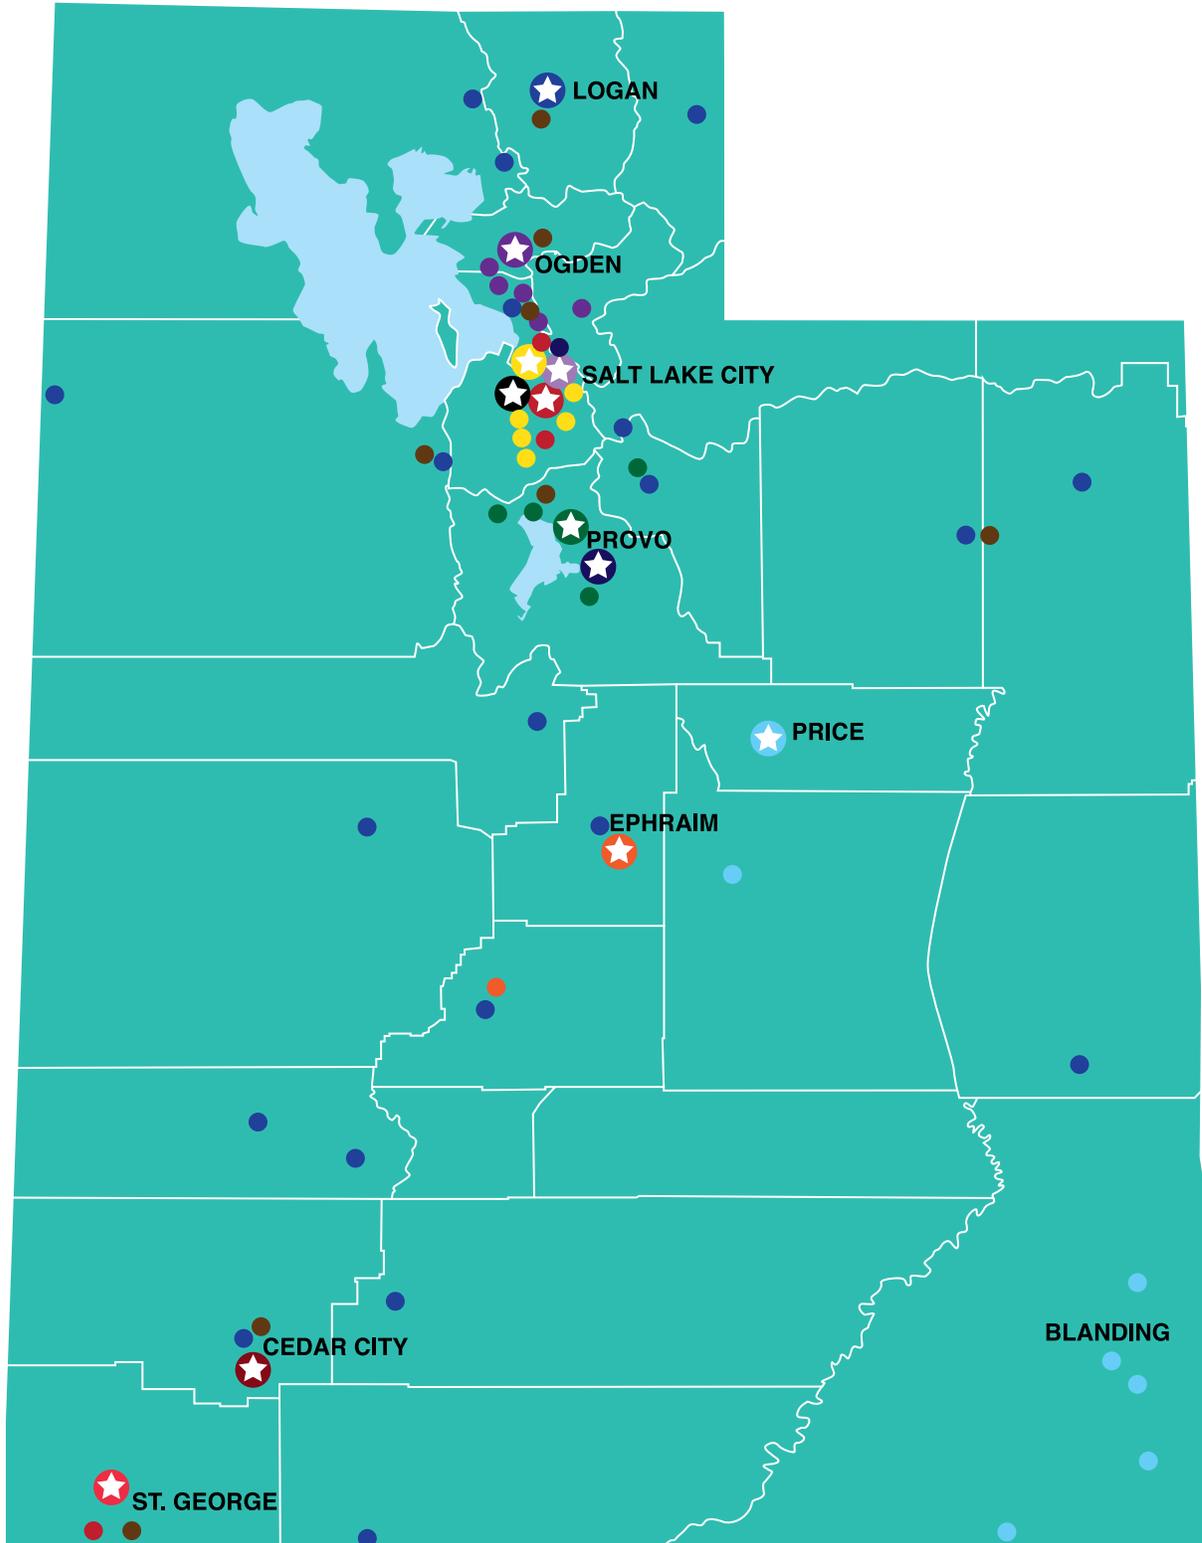

Quick tip: all of the colleges and universities included by name in this guide are accredited and not-for-profit.

PAYING FOR COLLEGE

College can be expensive and figuring out how you're going to pay for it can seem like an overwhelming task. Luckily, there are resources to help you prepare and many different ways to get the money you need.

With many funding options available—from scholarships and grants to work-study and student loans—you can pay for college.

No matter what grade you're in, there are things you can do right now to get started.

College comparison worksheet

Use this worksheet to compare colleges you'd like to go to. Search online, get a Facts at a Glance booklet from your counselor, or use the Utah colleges information starting on pg. 20 in this guide to help you.

College							
Majors the college offers I'm interested in

SAVING FOR COLLEGE

Start saving as much as you can, as early as you can.

Saving money is an important part of college affordability. Start saving as much as you can, as early as you can. Here are a few tips to help you get started.

Bank/credit union savings and cash deposit (CD) accounts

Research terms and conditions for a savings account that meets your needs. Find more information at your bank/credit union and on websites such as americasaves.org to compare options before making your decision.

my529

my529, Utah's official 529 educational savings plan, is a tax-advantaged 529 plan designed to encourage investing for future qualified higher education expenses.

Family and friends can even contribute money to your account for special occasions like birthdays and holidays. Learn more at my529.org.

Part-time work

Part-time work in high school and college can help you build your resume and pay for college costs.

Put as much of your paycheck as you can into your college savings account.

Scholarships

Scholarships are not just for students with good grades or an impressive list of accomplishments. You can get scholarships for volunteer service, leadership, talent, financial need, and more.

TIPS FOR FINDING SCHOLARSHIPS

Beware of scholarship scams!
You should never pay money to apply for a scholarship.

1

Explore options at your school. Talk with your college access advisor and/or counselor, scholarship coordinator, and athletics coach. Ask about scholarships through your employer, your parent's employer, or any clubs or organizations you're involved with.

2

Create profiles on trustworthy national scholarship search websites such as:

- chegg.com/scholarships
- bigfuture.collegeboard.org/scholarship-search
- cappex.com
- fastweb.com

3

Use the scholarship toolkit at UtahFutures.org to get started.

4

If you're an **undocumented student**, you can find additional information on applying for scholarships at educate-utah.org. See pg. 43 for more info.

5

Check with the financial aid offices at the colleges you plan to attend. Many colleges have scholarships posted on their financial aid and department websites. If you know what you want to study, check for scholarships through your major or department.

6

Sign up for the UtahFutures newsletter at UtahFutures.org to learn about scholarship opportunities.

7

In 12th grade, submit the Free Application for Federal Student Aid (FAFSA)—sometimes scholarships require this as part of their application process.

8

Apply. Apply. Apply. Don't count on only one scholarship to fund your education.

9

Apply for scholarships even if you don't plan to go to college right away—like if you plan to serve a religious mission or join the military. See pg. 42 for more info.

STATE SCHOLARSHIPS

This year, four major scholarships offered by the State of Utah have been updated. These scholarships include two academic scholarships, one new need-based scholarship, and one teaching scholarship. Talk to your college's financial aid office to see if you qualify for these scholarships.

REGENTS' SCHOLARSHIP

Students who take the right classes in high school and meet other requirements may qualify for this scholarship from the State of Utah.

Scholarship Facts:

1. The Regents' Scholarship is an academic scholarship that you can earn by taking required classes in high school to prepare for college.
2. Starting with the graduating class of 2020, the Regents' Scholarship can be used at public colleges in Utah, including technical colleges, but not at private institutions like Brigham Young University, LDS Business College, and Westminster.
3. You apply for the Regents' Scholarship during your senior year, but you need to start planning now to take the right classes in 9-12 grade. To learn about the scholarship requirements, visit RegentsScholarship.org.
4. If you apply you will be required to submit a completed FAFSA application, but you are NOT required to qualify for federal grants or loans.
5. The Regents' Scholarship can be used to cover tuition and fees for a total of four semesters, subject to meeting renewal requirements. Visit RegentsScholarship.org for more information.

NEW CENTURY SCHOLARSHIP

Students who accelerate their college education by earning an associate degree or taking a specific academic track while in high school may qualify for the New Century Scholarship.

Visit NewCenturyScholarship.org for more information.

UTAH PROMISE SCHOLARSHIP

The Utah Promise Scholarship is for students who need financial assistance to pay for college and is available at all public colleges and universities in Utah, including technical colleges.

The Utah Promise Scholarship will cover up to full tuition and fees for up to two years.

Talk to the financial aid office at your college to see if you qualify for the Utah Promise Scholarship.

T.H. BELL SCHOLARSHIP

The T.H. Bell Scholarship is for those students who study education and intend to work in a Utah public school.

The T.H. Bell Scholarship can be used at all public or private colleges in Utah that offer an approved program. Talk to the financial aid office at your college to see if you qualify.

To be eligible for this scholarship, recipients must study in an approved teacher preparation program or in an approved program that prepares an individual to become a speech-language pathologist or another licensed professional providing services in a public school to students with disabilities

Tip: Use the FAFSA4caster at fafsa.gov to estimate how much you might get in grants, work-study, and loans

APPLY FOR FINANCIAL AID

Submitting your Free Application for Federal Student Aid (FAFSA) at fafsa.gov is the only way to receive federal financial aid for college.

Who should submit the FAFSA?

Everyone should submit, even if you think you make too much money to qualify for financial aid. You never know what you'll be awarded unless you apply.

What does the FAFSA do?

The FAFSA determines your eligibility for federal financial aid—grants, work-study, and student loans—as well as aid from the State of Utah (like the Regents' Scholarship) and your college.

When should I submit my FAFSA?

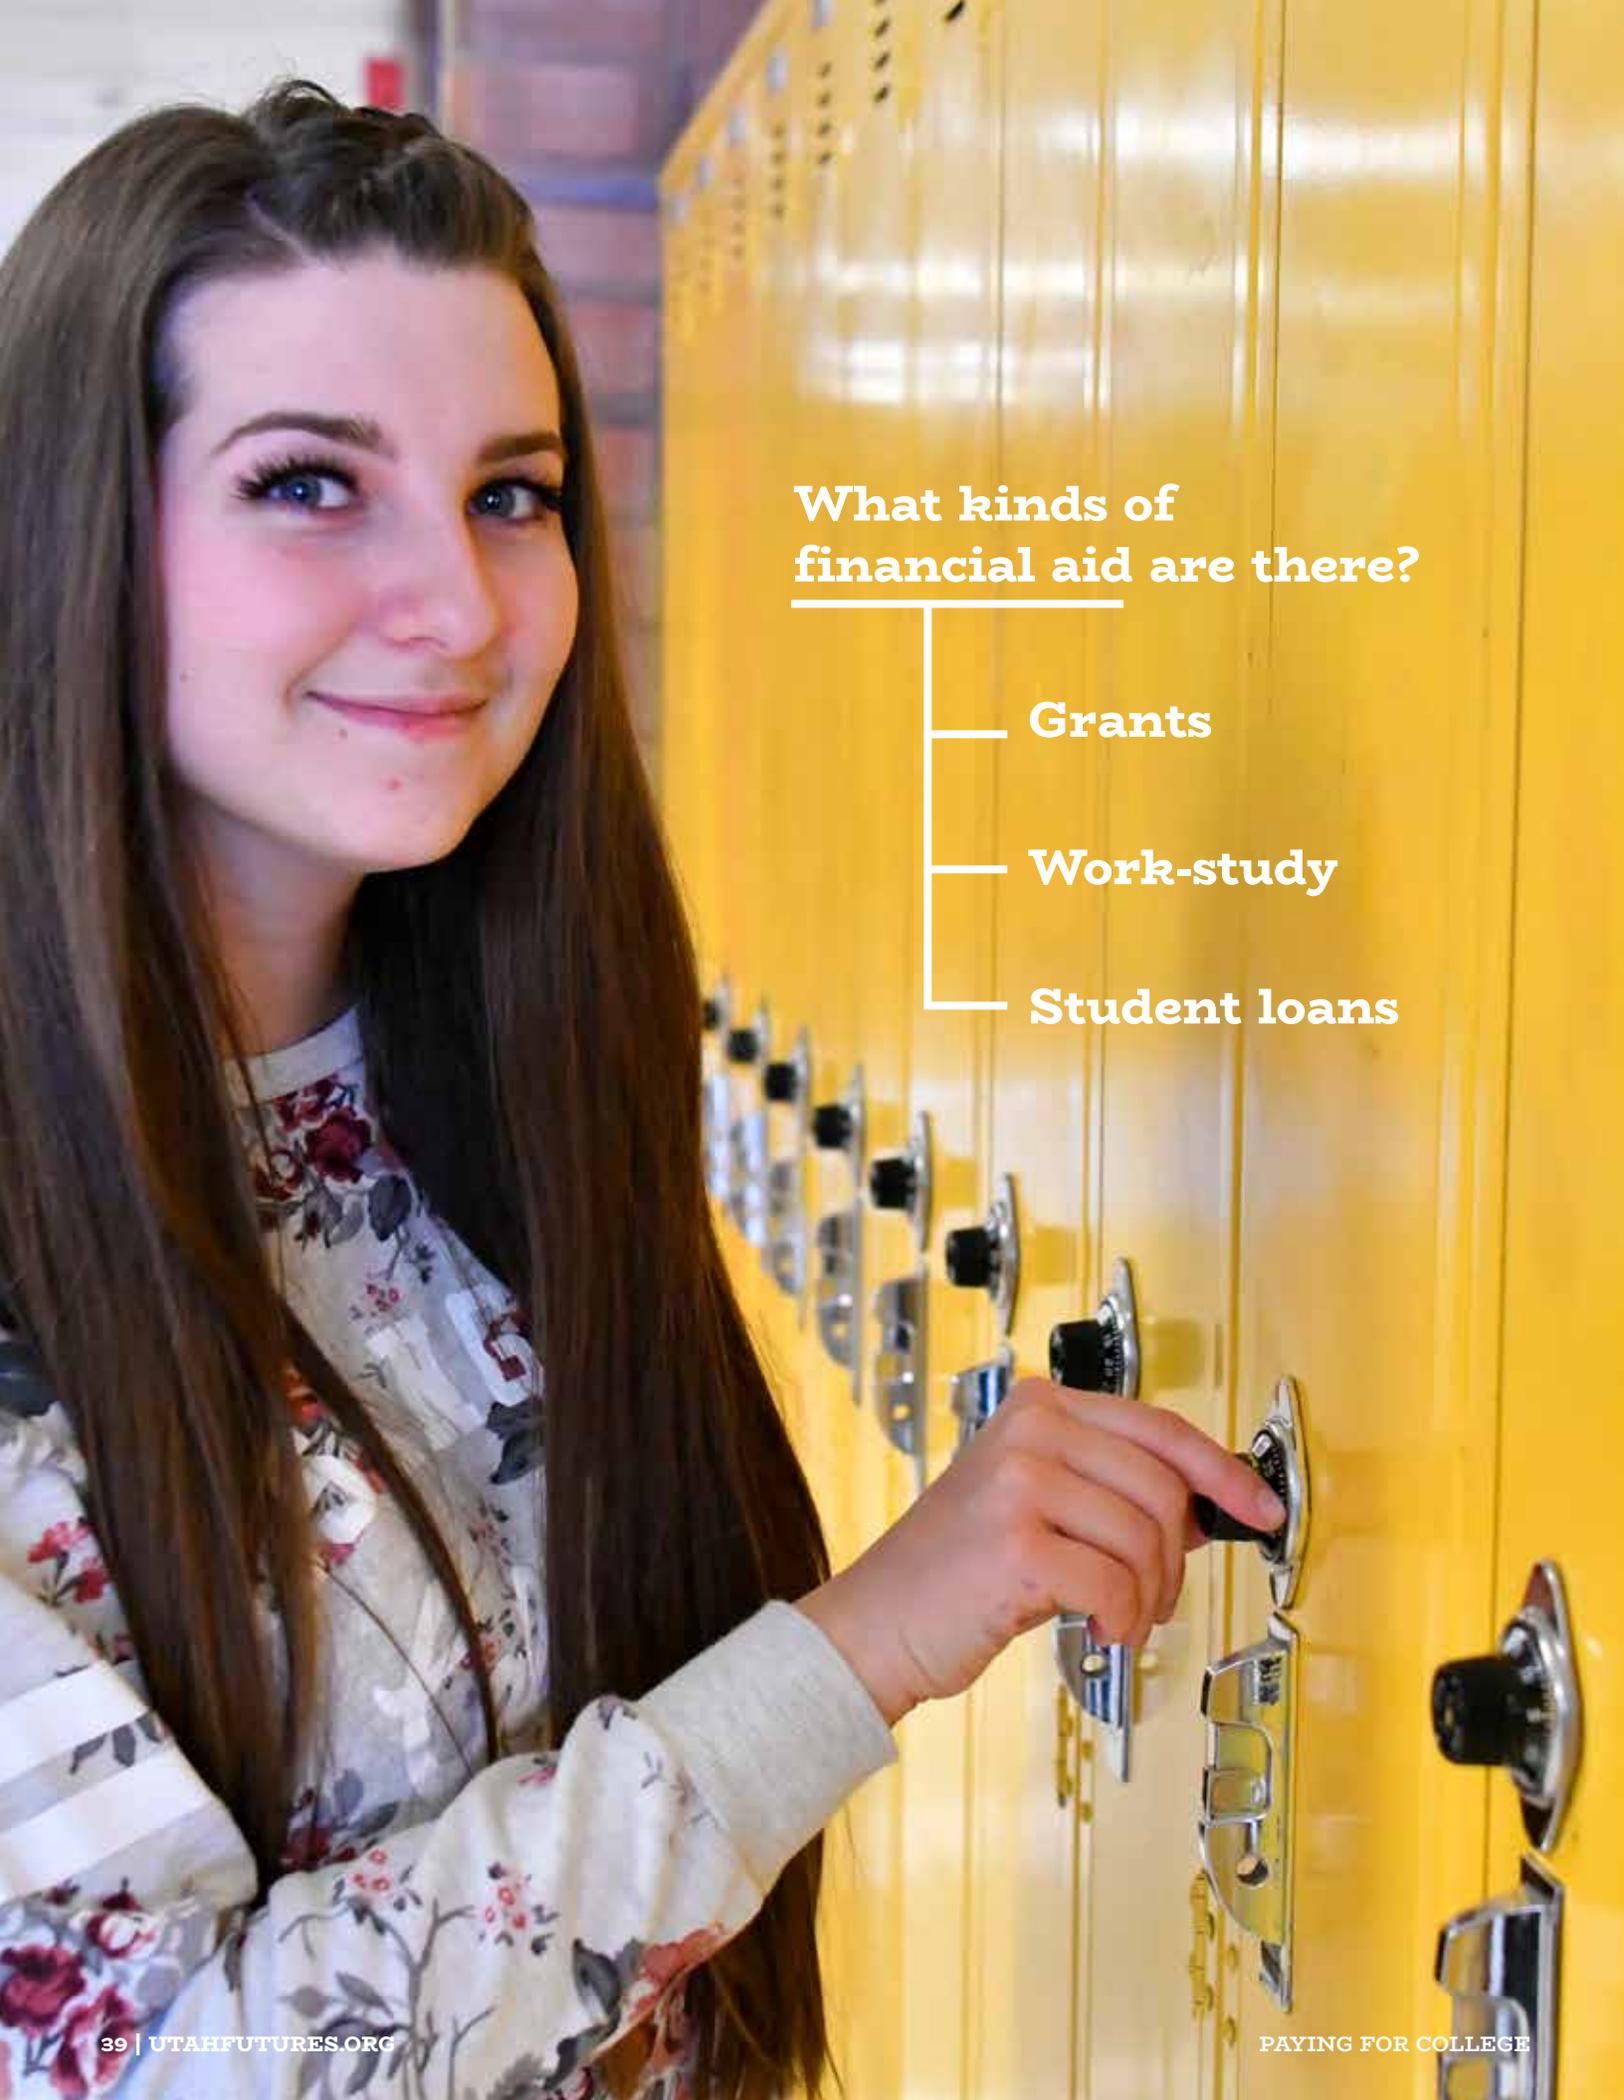

It's best to submit the FAFSA the same time you apply to college in the fall of your senior year. The FAFSA application opens October 1 of your 12th grade year. You can complete the application at any point in your senior year, but for the following school year you should apply as soon as you can. However, you can still submit your FAFSA later than that if needed. Check the priority deadline at the colleges you're applying to so you know when you should complete the FAFSA. **Remember: You need to resubmit the FAFSA every year you're in college.**

Where do I go to submit the FAFSA?

Submit the FAFSA at fafsa.gov or use the official myStudentAid mobile app from Federal Student Aid. Never use any other website to file. If you need help submitting your FAFSA, ask your college access advisor, find a FAFSA Completion Open House at UtahFutures.org, or watch the FAFSA Walk-Through video at the UtahFutures YouTube channel.

Even if you don't think you'll qualify for financial aid, it's worth taking a few minutes to submit the FAFSA. You may be surprised!

**What kinds of
financial aid are there?**

- Grants**
- Work-study**
- Student loans**

GRANTS

What is it?

A grant is money for college that you don't have to pay back, as long as you maintain satisfactory academic progress. A grant is usually provided by the state or federal government.

What do I need to know?

Grants don't have to be repaid.

They're based on financial need (determined by the FAFSA).

One of the most common grants is the Federal Pell Grant. The maximum award is more than \$6,000 per year.

Ask the financial aid office at your college for more info about available grants.

WORK-STUDY

Work-study is a part-time job for students that is usually on campus and has flexible hours that generally work around your class schedule.

Work-study jobs are usually on campus and offer flexible hours.

Work-study jobs come with financial aid benefits.

They can give you work experience related to your college major (such as working in a chemistry lab, tutoring center, or campus business office).

STUDENT LOANS

Student loans are money you borrow for college that you have to pay back—even if you don't graduate.

If you're eligible to receive grants or take part in the work-study program, always use those funds first.

Apply for as many scholarships as possible and use college savings before deciding to borrow student loans.

Explore federal student loans first (through submitting your FAFSA), as they often have lower interest rates and more flexible repayment options compared to private loans.

Should I take out a student loan?

When you file the FAFSA and send it to your college, the financial aid office will send you a financial aid offer letter that includes the cost of attendance (tuition, room and board, etc.) and what scholarships, grants, loans, or work-study you are eligible for.

Sometimes the cost of attendance will be more than you have in college savings, scholarships, grants, or work-study funds. If you've filed the FAFSA, you are eligible for federal student loans, which are a good option to cover those additional remaining college costs.

What to consider before taking out a student loan:

- 1. Create a budget with help from your college's financial wellness center.**
Many colleges have a financial wellness center that will answer your questions about budgeting, loans, and ways to pay for college.
- 2. Explore ways to save, such as using student discounts or renting textbooks.**
- 3. Borrow only what you need and understand the loan.**
Remember, you are not required to borrow the maximum amount you've been offered. Any money that you borrow must be repaid with interest, so only borrow what you need! Read the terms and conditions of the federal student loan carefully when you accept your loan.
- 4. Borrow federal before private.**
Federal student loans have advantages over private loans, including fixed interest rates and flexible repayment options. Learn more about the benefits of federal student loans at [UtahFutures.org](https://utahfutures.org).

What if I'm not going to college right after high school?

Are you planning to join the military or serve a religious mission before enrolling in college?

You should still apply for college and financial aid as a high school senior to lock in your admissions and scholarships. Many scholarships are only open to graduating high school students. If you can't afford application fees, there are some programs that can help you cover those costs while you are still in high school but not after you have graduated. Apply now to find out what options are available to you.

Once you've been accepted, talk to your college about deferring enrollment or taking a leave of absence. If you are leaving the country or will not have access to email, be sure to complete a Family Educational Rights and Privacy Act (FERPA) form. Without this form, colleges will not legally be able to talk with your parents/guardians about you after you turn 18. Talk to your college's admissions office for information on what paperwork you'll need to complete.

COLLEGE IS READY WHEN YOU ARE!

Yes, you can go to college if you are undocumented!

5 things undocumented students need to know

1 Undocumented students, with and without Deferred Action for Childhood Arrivals (DACA), can attend college in Utah! All students, regardless of immigration status, are eligible for admission into any of the accredited colleges and universities (public and private) in Utah.

2 Earn college credits in high school: Undocumented students (with and without DACA) can participate in Concurrent Enrollment (CE), Advanced Placement (AP), and International Baccalaureate (IB) classes while in high school, saving time and money once you get to college.

3 Scholarships: Utah high school graduates do not need to provide proof of citizenship to qualify for privately funded scholarships. For a comprehensive list of privately funded scholarships in Utah, visit educate-utah.org.

4 In-State Tuition Waiver: Utah state law allows qualifying undocumented and DACAmented high school graduates to pay in-state tuition rates if they attend a public Utah college or university. To learn more about qualifications, talk to your counselor or visit educate-utah.org/hb144-facts. You may want to ask specifically about "HB 144" and "SB 253."

To **qualify** for HB 144, a student must submit a HB 144 Affidavit for the institution they want to attend and meet the following requirements:

- Student must have attended a Utah high school for three or more years
- Student must have graduated from a Utah high school with a diploma or G.E.D.

5 To find additional support and information visit:

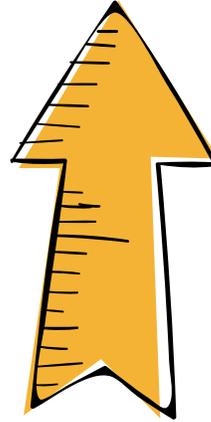

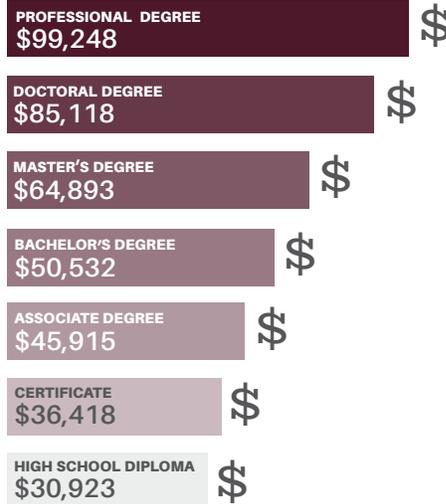

- educate-utah.org
- University of Utah Dream Center: dream.utah.edu, which has important information for undocumented students, regardless of which college you plan to attend.

5 WAYS COLLEGE PAYS

GREATER WEALTH

Most college graduates earn twice as much in their lifetime as someone who only has a high school diploma.

Annual earnings based on degree

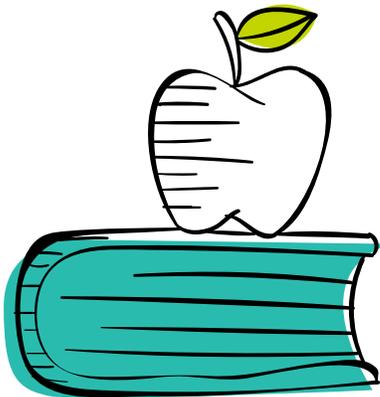

BETTER BENEFITS

Jobs that require a college degree provide more flexibility and are much more likely to offer health insurance.

STRONGER COMMUNITY

Want to make a difference in the world? Individuals with a college degree are more than twice as likely to volunteer, and those with a bachelor's degree are **twice as likely to vote**.

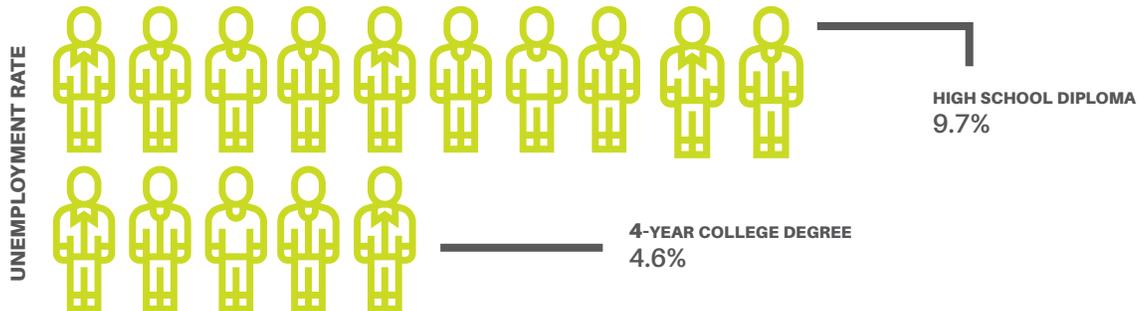

IMPROVED HEALTH

People with a college degree are 44% more likely to report very good or excellent health. And **the life expectancy of young adults with at least some college education is seven years longer** than those who have never gone to college.

MORE SECURITY

The more education you get, **the less you have to worry about unemployment**. People with only a high school diploma are about twice as likely to be unemployed as those with a college degree.

PARENTS:

College is for you, too!

If you are thinking about college for yourself, take a look at the college search on UtahFutures.org/adult and call college admissions offices to see what they can offer you.

Colleges have many resources like tutoring, child-care assistance, online options, and even classes where you only meet once per week that can help you balance family, work, and school.

Start or finish your college degree now!

UtahFutures.org
